

Atty. Dkt. No. 018844-0307

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicant: Angelika Utecht

Title: Geranium Plant Named 'FIP 202'

Appl. No.: 10/715,541

Filing Date: November 19, 2003

Examiner: K. Bell

Art Unit: 1661

**CLAIM FOR CONVENTION PRIORITY**

Commissioner for Patents  
PO Box 1450  
Alexandria, Virginia 22313-1450

Sir:

The benefit of the filing date of the following prior foreign application filed in the Canadian Plant Breeders' Rights Office on December 23, 2002, is hereby requested, and the right of priority provided in 35 U.S.C. §119 is hereby claimed.

In support of this claim, filed herewith is a certified copy from the Canadian Food and Inspection Agency, Plant Breeders' Rights Office:

- CANADIAN PLANT BREEDER'S RIGHTS APPLICATION NO. 02-3400 'FIP 202' filed December 23, 2002.

Respectfully submitted,

Date

March 1, 2004

☐ OTHER \_\_\_\_\_

**TO BE COMPLETED BY APPLICANTS/AGENTS REQUESTING A PROTECTIVE DIRECTION**

(A PROTECTIVE DIRECTION FEE OF \$50 MUST BE ENCLOSED TO VALIDATE THIS SIGNATURE)

I/We request that a protective direction be given in respect of the plant variety covered by this application. I/We undertake while the protective direction is in force, that no propagating material of the plant variety will be sold in Canada by me/us, or with my/our consent, except as provided in subsection 19(2) of the Plant Breeders' Rights Act, in the period between the making of this application and the time when the Plant Breeders' Right is granted, or refused.

Signature of applicant \_\_\_\_\_ Date \_\_\_\_\_

**TO BE COMPLETED BY ALL APPLICANTS/AGENTS**

I/We am(are) the owner(s) or acting on behalf of the owner(s) of this novel plant variety, and believe that the variety is distinct, uniform and stable as required in subsection 4(2) of the Plant Breeders' Rights Act. I/We understand that test results must be carried out using acceptable scientific procedures. I/We certify that the sample of propagating material supplied (where applicable) is representative of the variety.

Making a false representation is an offence and may result in a loss of the Plant Breeders' Right and prosecution.

**APPENDIX VI**  
**LEGAL REPRESENTATIVE STATEMENT / ASSIGNMENT BEFORE THE ISSUE OF**  
**PLANT BREEDERS' RIGHTS**

The following letter may serve as a standard form to be completed prior to application as evidence establishing the applicant as the legal representative, or after application when an assignment of a new variety occurs prior to a grant of rights.

I, Angelika Utecht ..... whose full post office address is  
Hinterer Rebstock 38  
56410 Montabaur  
Germany

in consideration of \$..... the receipt of which is hereby acknowledged, do hereby sell and assign, effective the ..... day of ..... 19.....,

to Florfis AG ..... whose full post office address is  
Parkstrasse 33  
4102 Binningen  
Switzerland

my interest in Canada for the Pelargonium variety entitled 'Fip 202'  
(crop kind) (denomination and application no.)

As described and claimed in my application for Plant Breeders' Rights and to all my corresponding right, title and interest in and to any grant of rights which may issue therefor.

Signed at Hillscheid ..... Germany  
(City or town) (Country)

this 5th day of November 19 2002

Witness I. Wickel .....  
I. Wickel  
A. Utecht .....  
A. Utecht (Signature of assignor)

Signed at Binningen ..... Switzerland

Parkstrasse 33  
4102 Binningen  
Switzerland

## GERANIUM 'FIP 202'

### 17A) Origin and breeding history of the variety

'Fip 202' is a hybrid of *Pelargonium zonale* x *peltatum*, which was derived from a hybridisation and subsequent tissue culture of the immature seeds.

The resulting seedlings were transferred from the test-tubes into rock-wool cubes, and were grown in a greenhouse for examination and selection in 1998.

The female parent was a hybrid seedling (*Pelargonium zonale* x *peltatum*), no. K 90-2022-8, having red, single-type flowers and dark.-green foliage with strong zonation.

The male parent was the ivy geranium (*Pelargonium peltatum*) seedling, no. I95-0337-18, which had been derived from crosses between the red-flowered varieties: Yale, St. Malo and Momo.

The selected hybrid seedling, no. K98-3173-1, was asexually propagated by cuttings, which were used for further examination and for trial cultivation, starting in 1999.

Hybridization, tissue culture, selection of the plant and examinations of the clone were conducted in Hillscheid, Germany.

### 17 B and E) Statement of uniformity and stability Methods for maintaining the variety

Variety 'Fip 202' originated from a single seedling that was propagated asexually. It is a uniform clone, without genetically variation.

The stock plants in Hillscheid, Germany, and Cuernavaca, Mexico\*, have been obtained by tissue culture and were checked for health and for stability of the described characteristics. They are used for propagation by cuttings (usually stem terminal cuttings).

### 17 C) Distinctness statement

The variety is characterized by bright red, semi-double flowers, dark-green foliage with strong anthocyanin colouring at times, and, for a *Pel. zonale* x *peltatum* hybrid, relatively compact plant habit and only moderately large leaves.

The most similar variety known to the breeder is 'Fisgren'.

In comparison to 'Fisgren', Fip 202' has deeper red, not orange-red, coloured flowers, smaller and darker green coloured leaves, only moderately vigorous growth and less tall plant habit.
